

BUNGALOW TAPERED COLUMNS

by **AFCO**
INDUSTRIES, INC.

BENEFITS

VERSATILE

Can be tailor fitted to almost any size needed.

MAINTENANCE FREE

Cellular PVC framing resists rot, cupping, splitting, twisting and insect infestation.

ECONOMICAL

Costs less than other building materials.

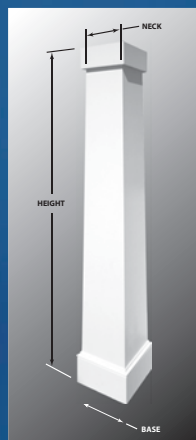

SIMPLE TO INSTALL

Easy to follow instructions.

DIMENSIONS

Base/Neck Height

16" / 9"	60"
16" / 9"	66"
16" / 9"	72"
12" / 7"	60"
12" / 7"	66"
12" / 7"	72"

INSTALLATION INSTRUCTIONS FOR BUNGALOW COLUMN (Non-load bearing)

- Measure & cut staves to the exact floor-to-ceiling height. All cuts on the tapered wrap must be done at the top of the column.
- Join three (3) of the staves at 90 degree angles along the mitered edge.
- Nail with 2" finishing nails along stave edge from top to bottom.
- Align the three-sided wrap around a load bearing post.
- At the bottom of the column, use a 2x4 at the space between the post and inside column edge.
- Nail the 2x4 to the post & column with 2" finishing nails. (Screws may be used if a metal post is installed).
- Toenail 2" finishing nails at the column to the ceiling supports.
- Tap in the remaining stave with a rubber mallet to complete the column to fit snug.
- Cut the cap to fit at the top of the column and nail with 2" finishing nails. Join the bottom base with 2" finishing nails.
- Caulk mitered edges, nail holes, cap/base and gaps with white caulk.
- Sand lightly before painting; use 100% acrylic exterior latex paint that has a LRV of 55% or higher.
PAINTING IS RECOMMENDED.
- If using a rail system, place blocks on the inside of the column wrap where the rail will be attached at the top & bottom (not included).
